She's a Humdinger

Simon Brown fishing from the vessel "HUMDINGER" caught this 114.6 kg Big Eye Tuna on the 11th of December 2013. This is the first big game fish of the 2013 season weighed at Mercury Bay Game Fishing Club and the first of many for the Twomey family's Elite 15m launch Humdinger, built locally by Scott Lane Boatbuilders and launched on the 3rd October 2013 at Pine Harbour Marina.

FRESH MARKET

TWILIGHT MARKET
23rd DEC 2013 4-8pm

This will be the last market for 2013. Pine Harbour Fresh Market will resume on Saturday 11th Jan 2014.

Going away over the Christmas period?

We often have enquiries from visiting boaties looking for berths short term.

Contact Pine Harbour reception on 09 536 4720 if you are interested in renting your berth whilst you are away in your boat.

Dredging

Dredging of the approach channel to Pine Harbour Marina was completed in November 2013. We have taken the maximum allowable limit under our resource consent this year.

Basin dredging will be completed early December 2013 just in time for the summer season.

Further dredging is anticipated to be carried out during the winter months of 2014.

We would like to take this opportunity to thank you for your patience during these times.

Boat Park/Hardstand

Work is underway to relocate the boat park racks closer to the launching area.

Pedestrian access to the loading pier is now via a new pathway which runs from the Chandlery and Marina Dentists to the breakwater.

Additional trollies will be available for your convenience in the main car park and outside the chandlery.

Please return these trollies after use.

Your assistance loading and unloading from the car park area thus minimising vehicle traffic to the loading /work berths will be greatly appreciated.

Planning is also underway to reconfigure the hardstand/ haul out area to reflect Auckland Council's new run off standards for marina hardstands and the recently consented plan change for new residential development.

Post Xmas/New Year Holiday

Is a great time to book for a haul out while the weather is fine – we are taking bookings now. Please call the Hardstand on 021 910 383 or Pine Harbour Reception on 09 536 4720

Berth Holder/Carparking

B Pier Power Modules

B Pier Power Modules are almost complete. Please be aware that the socket outlet in your vessel will need to comply with the new safety standards.

The Berth holder car park will be extended into the top adjacent car park over the Christmas holiday period from the 25th December 2013 to 15th January 2014.

This is for the benefit of berth holders only, please respect fellow card holders by not allowing friends and non-card holders to park in this area.

Join the Fight Against Fanworm

The message for anyone moving a vessel is slip it, clean it & anti-foul its hull. Fresh is best, ideally anti-foul will be less than six months old when the boat arrives in Northland. And, boats with anti-foul older than 12 months will not be able to rent a berth at a marina in Opuia, Kerikeri or Whangaroa.

Far North marinas in Whangaroa, Kerikeri & Opuia are joining the Northland-wide fight against Mediterranean fanworm & it may affect the ability of touring holiday boaties to find marina accommodation for their boats this summer.

In practice this means that boats visiting the Far North marinas this summer will need to provide information about their recent location, the age of their anti-foul &/or recent haul outs.

Marinas in the Whangarei area have already adopted similar restrictions. If you are planning to travel to Northland in your boat this summer please contact one of the marinas in that area, well in advance, to discuss the conditions around renting a marina berth.

Mediterranean fanworm (*Sabella spallanzanii*) is a marine animal typically found in estuaries or sheltered sites, at depths of anywhere between one to 30 metres. Internationally recognised as a significant marine pest, it consists of a tough, flexible tube – often muddy in appearance & always anchored to a hard surface – which is topped with a single spiral fan. They grow up to 40cm long & the fans are white, banded with brown & orange, & have an orange central stem.

Mediterranean fanworms are unwanted because they can form dense groups that compete with native species for food & space. The presence of Mediterranean fan worm in Northland would jeopardise the local economy & the ecology, potentially destroying seafood & marine reserves. A growing number of Northland stakeholders hope to hold back the tide of this invader being carried into Northland waters on boats. Auckland waters are heavily infested.

Pine Harbour Living

Jalcon Homes launches new website.

With Jalcons involvement in stage 1 and 2 of the Pine Harbour development they have recently launched a new website promoting the 28 Prestige homes they will be building in 2014.

Visit www.jalcon-pineharbour.co.nz to get plans and prices or click the link from our Pine Harbour website.

Pine Harbour Cruising Club

Message from the Cruising Club.

The Pine Harbour Cruising Club is a family-friendly, inclusive bunch of boaties. We encourage all boaties, racers, cruisers or launches - experienced or newbies - to join in the fun and hang out with liked-minded people. We have plenty of land and sea-based social activities planned for 2014. Maybe a whiskey tasting tickles your fancy? How about a cruise to a winery on Waiheke or other lovely locations around the gulf? There's something for everyone. For the racers - we have a Twilight Series on Thursday evenings in the sum-

mer (with a post-race BBQ), and the Mount Gay Rum Series every other Sunday in the winter. If you're open to the idea of racing but you don't yet have a crew or you need to learn the ropes on another boat first, we can help you with that too. The skippers are happy to share their knowledge and take you on as crew until you're in a position to do your own thing.

Membership is very reasonable just \$130 per year with a nomination fee of \$40.
